

QUICK CHANGE-OVER SYSTEMS

centroteX Standard S4

Quick change-over system with extensive assortment of standard clamping devices or individual clamping devices

Size S4
Change-over time < 2 min.

Advantages

- One of the smallest, standardized quick change-over systems on the market – especially for small spindles
- Dramatic reduction in clamping device change-over times
- Repeatability between machine adapter and clamping device adapter ≤ 0.003 mm – without alignment
- Machine-overlapping utilization of clamping devices
- Power actuation or fluid actuation of the clamping devices are possible
- For easier handling, MonteQ mounting aid can be implemented for heavy clamping devices
- Large selection of standard clamping devices
- Bayonet coupling
